MAINTENANCE GUIDE

PREVENTATIVE MEASURES

- Place mats at exterior doors to trap moisture, sand and grit. Use rugs in high traffic pathways, at the end of stairs and near doorways. Avoid rubber backing or non-ventilated rugs.
- Use protective pads on furniture
- Always clean using as dry of a method as possible

DAILY CLEANING

Vacuum or sweep the floor on a daily basis. Don't let sand, dirt or grit build up. They act like sandpaper, abrading and dulling the surface finish.

Wipe floor clean using a well wrung-out microfiber mop with Bona Cleaner added to the cleaning water (1:1 for regular cleaning, 1:5 for heavily soiled floors). Replace the cleaning water frequently and the mop as well if needed. Bona Cleaner is also suitable for use in the scrubber driers which are effective for cleaning larger floors but should be handled with care on wooden floors. Only use white and red pads/brushes on scrubber driers so as to prevent scratching the surface. Always use as little water as possible to clean the floor and take care not to leave puddles.

When a spill occurs, soak up the liquid right away. Mist the area with diluted Bona Cleaner and wipe off with your Bona Mop. The Bona Spray Mop is also practical for these situations.

MAINTENANCE

If the floor seal is starting to show signs of wear (i.e. a dulling of the surface) a protective maintenance coating such as Bona Polish or Bona Freshen Up should be applied. For application use Bona's special application pad and apply ideally to the whole floor surface. Clean the floor thoroughly prior to application to ensure that dirt is not trapped in the coating.

EXTENDED MAINTENANCE

Bona offers three extended maintenance offers divided into Gold, Silver & Bronze treatments.

Deeply scratched and stained floor — **Gold treatment** — full sanding & new finish
Light scratches and soiled floor — **Silver Treatment** — superficial sanding & overcoating with finish
Dry and soiled floor — **Bronze Treatment** — deep cleaning & polish application

These services are provided by your local flooring contractor.
